

POSTGRESQL ASSIGNMENT

1. *How many payment transactions were greater than \$5.00?*
2. *How many actors have a first name that starts with the letter P?*
3. *How many unique districts are our customers from?*
4. *Retrieve the list of names for those distinct districts from the previous question.*
5. *How many films have a rating of R and a replacement cost between \$5 and \$15?*
6. *How many films have the word Truman somewhere in the title?*
7. *We want to know what customers are eligible for our platinum credit card. The requirements are that the customer has at least a total of 40 transaction payments. What customers are eligible for the credit card?*
8. *When grouped by rating, what movie ratings have an average rental duration of more than 5 days?*
9. *Create a **Jumia** table that has the following column User_id, Username, Password, Email Address, Phone No (fake No) & Location.*
10. *Insert 50 data into the table*

Submit your assignment in a word page on or before 9pm July 21, 2021. This assignment will be graded.
